Let us take an initial look at a visualization of the career statistics :

Robert Lewandowski has scored almost 30% of the total goals of all the strikers combined.

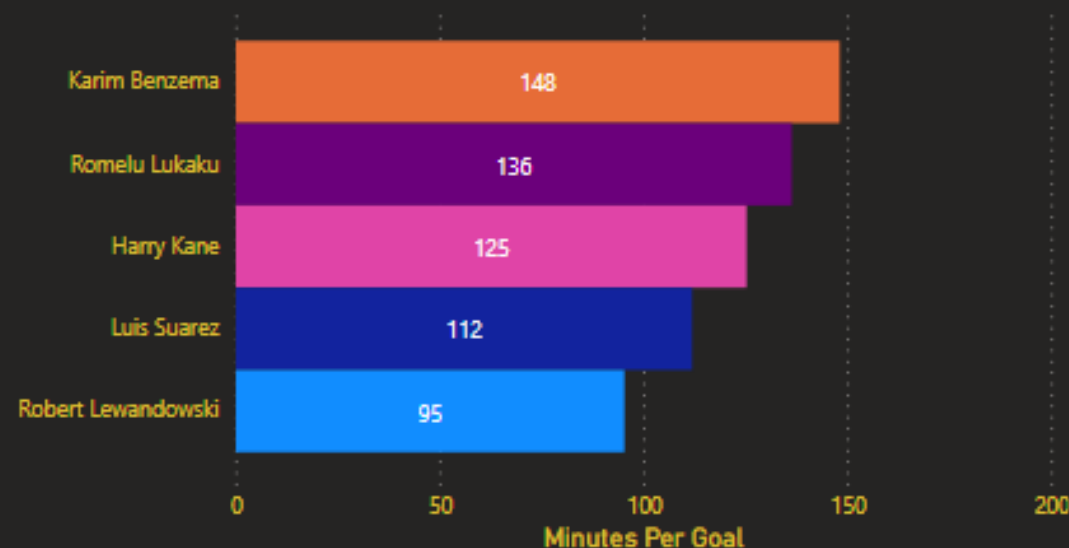

The goal per game represents the total number of goals per appearances, whereas the assists per game represents the total number assists per appearances. This statistic means Lewandowski is the best goal scorer amongst the strikers.

Minutes Per Goal

Player ● Karim Benzema ● Romelu Lukaku ● Harry Kane ● Luis Suarez ● Robert Lewandowski

The goal per minute represents the number of minutes it takes for a striker to score a goal.

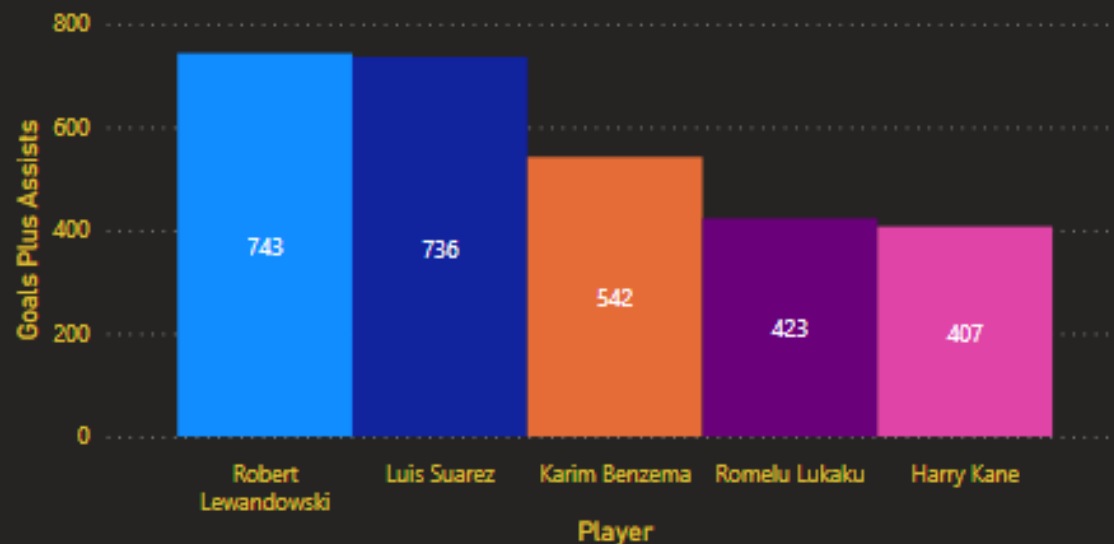

The higher the value, the longer it takes for a striker to score.

This means it takes about 95 minutes for Robert Lewandowski to score a goal while, Karim Benzema takes the longest time to score a goal, at approximately 148 minutes per goal.

Goals plus Assists is simply the sum total of goals scored and assists made.
